

## 5.1 Listening

### Benefits of Listening to Debates and Discussions

Students are more likely to develop their own comprehension of the material and make connections to their own experiences when they are actively involved in listening discussions and debates. Learning is boosted, when students are encouraged to generate opinions and create their own ideas about the material.

#### Debates

A debate is an organised discussion or argument on a topic or approach to a problem. Two sides participate in a formal debate: one is in favour of a resolution and the other is in opposition to it. Such a discussion is controlled by previously established rules or judging criteria. Debates may be scored in order to determine a winner.

#### Different viewpoints on an issue

Point of view on something is your unique viewpoint, which is how you specifically see the world. Perceptions or view points may vary based on the experience and exposure an individual receives.
